

Choose a built-in function from the task

Measure

`len()`, `min()`, `max()`, `sum()`

Reorder

`sorted()`, `reversed()`

Decide

`any()`, `all()`

Pair

`enumerate()`, `zip()`

Convert

`int()`, `float()`, `str()`, `list()`

Inspect

`type()`, `help()`

Ask what operation the program needs before choosing a function name.
